Presents some helpful rally setup tips for the 2018 Kalahari Rally

**KALAHARI RALLY
SETUP TIPS**

RR500 XC - RALLYE PRO

Navigation Equipment setup:

- MIGTEC Road book
- RNS Trip Master - 1 (Top Left)
- RNS Cap Repeater (Top Right)
- RNS Trip Master -2 (Bottom)
- RNS Multi Switch Controller
- Garmin Etrax 10/20 or 30
- Water proof watch

This is the ideal setup for rally navigation equipment that RRR recommends .

RNS & MIGTEC are used by factory teams at Dakar, Africa Race, Morocco Desert Challenge and so many other rallies world wide, that is why we use these products. They tried and tested , their parts and support are available from most teams when you are in need!

Tried and tested over 110,000km by RRR!

*RRR fits the 1st RNS Trip Master for line of sight on the top left for easy scanning of the trip master during high speed . Same for the Cap Repeater that is fitted top right, also line of sight. The RNS Cap Repeater as well as the Trip Master, both with big digits allows for better view than a standard GPS, especially at high speed! The 1st Trip Master is set on the Trip screen while the 2nd trip master is setup for speed. The Cap Repeater fitted with a small antenna size of a match box, allows the rider to follow a degree heading and changes as the bike changes direction. **Tried and tested over 110,000km by RRR!***

The 2nd Trip Master is setup with Speed Screen so that the rider does not need to toggle between Trip and Speed during a DZ(Speed Zone). The 2nd Trip also acts as a backup in case of crash damage to the 1st unit.

*RNS Trip Master has:
Speed, Trip, Time, Auto Calibrate with other fine tuning*

RNS produces arguably the best Multi Switch Controller in rally that is a robust aluminium CNC machined casing, not plastic.

RRR uses the Multi Switch, so no having to stop in a Special and switch pick up sensor cables when a trip meter is broken from a crash. Single Block Switch is also an option if a rider prefers 1 trip master.

Tried and tested over 110,000km by RRR!

After trying many type of grips, RRR has found that Ariete produces the best rally grips, that are incredibly soft on the hands, yet will last 5000 + km without issue.

Tried and tested over 110,000km by RRR!
