

I believe that "photographs rekindle faded memories"

As a young entrepreneur straight after school I bought my first interchangeable lens camera and sold my first action photos in March 2001 to regular river rafting clients that never had a photograph of their river adventures, it felt awesome to supply a photo to always remind them of their action filled life.

As the years went passed I developed a sound understanding of angles and lighting, with the digital era arriving my hobby quickly became an extra income and I started to perfect my abilities in different environments indoors and out.

With 13 years' experience I established "Extreme Memories Captured" where sports photography, team building and events photography, promotional photography and media consulting form our core value

In 2016 I became involved in motor-sports photography, with "Motorsport South Africa" accreditation and assistants from Piere Wessels at Phatman designs I now supply photographs as a downloadable option straight from www.xmemories.co.za which makes it possible for anyone to share their memories a lot easier.

Other forms of delivery are various printed options, USB drives, digital transfers, sharable files from google drive and dropbox for multiple downloads, CD/DVD and photobooks.

I have attended all National cross-country series events since the Mpumalanga 400 in 2016 and supplied photos to various competitors including Evan Hutchinson, Marius and Jolinda Fourie, Garry Berthold, Johan Horn, Johan van Staden and Brian Baragwaneth.

My images have also been featured in and on the cover of Motorsport world SA

I have also attended all but 2 GXCC events since the second to last event at Fochville in 2016 and was also the official photographer at the RFS Econnorun in 2017

My passion for motorsport photography led me to acquire an off-road bike witch I use to get to the most rewarding and unique spots to supply the best quality photographs in the business and the team I assemble share the same passion for the sport I truly love.

Listening to the laughter and conversation over the memories I just supplied and finding shared images on social media and marketing material gives me the greatest pleasure and sense of achievement.
