

>>> RALLY SAFETY SYSTEM

Rally Safety System

- Complete rally monitoring system based on GPS and GLONASS satellite positioning technology, GPRS data transfer and advanced cloud server data processing.
- Online solutions for rally control and interactive dispatch of services.
- The GEOTRAQ system is developed, maintained and operated by active rally drivers and co-drivers.
- Over 5 years of experience in rally monitoring and interactive timekeeping.
- „From racing seat to code-base in five minutes“. Fastest response in market.

Overview of the system

Tracker based on
Newest GPS and
GLONASS technology

Hyper **cloud server**
data processing,
SMS gateway

External **Satellite**
tracker systems,
External **TAG HEUER**
timing devices

GEOTRAQ
solutions

Race Control Module
„Maximum Safety“

Timekeeping Module
„Precise and cheatproof“

Live Module
„makes it viral“

Tracker device

- GPS and GLONASS navigation systems
 - maximum of precision, even in the harshest enviroments
- GPRS class 10 communication
 - Fast and reliable 3G speed for data transfer
- High sensitivity internal antenna
 - No need of external cables and antennas
- Li-Po internal rechargeable battery
 - Self-sufficient up to 12 hours with back up power
- Build-in accelerometer
 - G-force data for direct accident assessment
- Internal flash memory
 - 100'000 records storage capability
- Compact size and light weight
 - 70x70x27mm – no need of special mounting brackets
- Waterproof IP67
 - Function guarantied in worse environmental conditions.

Alarm box

- SOS button
 - Distress call directly to Rally Control via SMS and GPRS communication
- Recovery button
 - Request to Rally Control for vehicle recovery
- OK button
 - Confirmation button for status, request, alarm call-off
- Red flag
 - Bright LED light when red flag conditions are activated by Rally Control
- Accident alarm
 - Bright LED light triggered when alarm is received from another competitor
- Overtaking request
 - Bright LED light triggered when overtaking request is received
- Buzzer
 - Alarm scenarios allow the use of a buzzer sound

Other geodata-sources

- Easy to integrate
 - External devices like SPOT satellite trackers are ready to be integrated into the system
- External SOS / Alert function
 - All functions of other geodata-sources work seamless
- Track data back up
 - All the records are stored on a back up server for later use and analysis

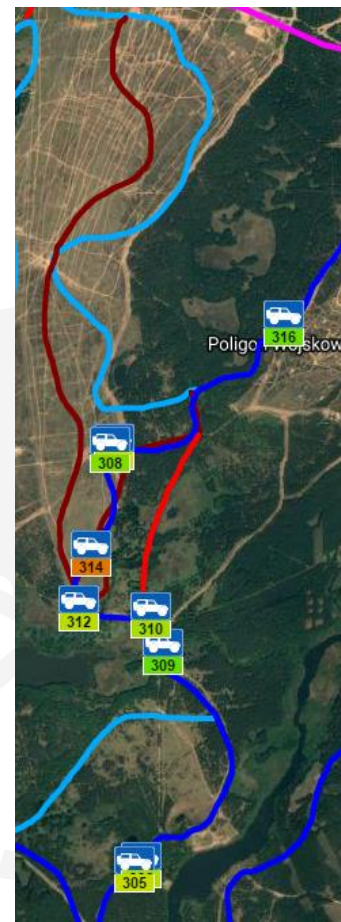

Other timing sources

- TAG Heuer
 - The system is already developed to use the latest TAG Heuer stopwatches

Safety features

- SOS button
 - Fast and accurate dispatch of medical crews over road and air
- Crash analyzing algorithm
 - Immediate alarm based on movement-profiling and G-force vector calculation
- Speed control
 - Monitoring of speed limits and record of speeding in selective and road sections
- Recovery button
 - Fast and accurate dispatch of recovery crews
- Temperature monitoring
 - Data for temperature in the cockpit allow for faster understanding of situations
- GSM coverage
 - Optimization of rally personnel on stages and proper positioning of marshals
- Overview of all vehicles in rally
 - Live tracking of rally vehicles, safety cars, ambulances, tow trucks etc.

Race control Module

- Overview of all vehicles in rally
 - Live tracking of rally vehicles, safety cars, ambulances, tow trucks etc.
 - Complete dossier details and direct SMS texting to crew and rally service
 - Active map with rally route (itinerary, control zones, spectators zones, etc.)
 - Refresh of position every 5 seconds when minimum network coverage is available
 - Selective red flag and accident alarm activation for vehicles in stage
- Alarm pop-up on screen
 - Manual SOS alarm activation by crew
 - Alarm if unplanned STOP in selective section
 - Accident detection via G-force accelerometer/temperature sensor
 - Accident report log integrated in the Rally Control module
 - Recovery alarms with process integration – services on the way, ETA times, etc.
- Dispatch interface
 - Fast and easy communication between dispatchers, marshals and competitors
 - Easy to use “touch screen system” to dispatch help to emergency location
 - Automated dispatcher report log with response times data collected by trackers
- Marshals’ lists
 - Paperless lists for each control zone dynamically updated by the data tracker

Timekeeping module

- Real time data interception
 - TAG Heuer stopwatches with SMS function
 - Active data from tracker devices
 - Data from other geodata-sources
- Automatic data analysis
 - Speed checks
 - Passage controls checks
 - Waypoints visible/masked
 - Time bonus in case of first aid, track blockage, etc.
- Live results
 - Split times selective sections and legs
 - Preliminary results with implemented penalties
- Competitor dossier
 - Complete details for each leg
 - Speed control and passage control checks
 - Penalties report
 - Leg replay
 - Comparison between competitors

USED BY THE ONLY TOOL NEUTRALIZED

Track duration: 00:00:00

Final calculation time: 00:00:00

Features list

- Very flexible system with fast integration
- On site software-upgrades possible
- Export and import of data in different formats (XML, PDF, GPX, KML)
- Makes the race transparent and fair
- Supports many data sources
- Compatible with PC, tab, smartphone
- Requires only browser + internet
- Provides own hardware with GPS and GLONASS support, which gives unmatched coverage and precision
- Used and devolped for most complex conditions, like marathon cross country rallies
- Can handle more than 500 competitors in 50 classes
- Track and speed comparison for disputes or complaints
- 100% automatic speeding penalty via GPS-data, nobody can slip through the speed control zone.
- Works redundant and allows standalone message triggers as crashes or emergency
- Provides a complete rally control solution for rallies, cross country bajas, rallies and marathons
- Livetiming, Livemap and Rally-Replay
- Pre-run mobile network coverage tool
- Developed and supported by active rally drivers, who know the demands. „From racing seat to code-base in five minutes“. Fastest response in market.
- Visual first-aid-times filter for precise time bonus gratification (cross country rallies)
- Can neutralize an area of problems (cross country rally)
- Automatic distribution of lists (entry, starter, results) to partners, foreign sytems and websites
- Advanced SMS communication module for fast and guaranteed message delivery to selected groups or individuals, registered in the event.
