## 1. ELIGIBLE VEHICLES

- 1.1. Vehicles must have valid registration and insurance and to be roadworthy for driving on public roads.
- 1.2. The rally does not require homologation / technical passports of the racing vehicles to be presented. These can, however, help in speeding up the scrutineering. There are however several safety and technical requirements which must be fulfilled before entering the scrutineering.
- 1.3. All vehicles must have all their registration plates secured to the vehicles.
- 1.4. Should the roll cage / roll bar be damaged during the event then it must be inspected by the Technical Delegate/Chief Scrutineer and the vehicle will only be permitted to continue if the cage is deemed safe by the Technical Delegate/Chief Scrutineer.
- 1.5. The overall technical requirements are a combination of the following:
  - General technical requirements for AUTO, Moto, ATV or SXS
  - The technical regulation for each of the competing categories of vehicles
- 1.6. The Specific Technical Regulations for each subcategory are published in the Appendixes.

## 2. CATEGORIES

### 2.1. Cross Country Rally Category

Vehicles able to cover a total distance of between 3200 and 3600km over 7 race days. Approximately 1800km are Special Stages which are mainly driven on public gravel and dirt roads. All vehicles must comply with the Technical Requirements of each vehicle category. The Stages of the rally will be drivable with a **4wd** vehicle.

### 2.2 Raid Category

Non-racing category for standard 4wd vehicles. No classification and no timing for this category. Experience the Kalahari Rally Liaisons, bivouacs etc., the complete event without racing, in a standard 4x4 or on an Adventure Bike with all the Safety and support of the official rally competitors!
